▶our mission

This web site is designed to create opportunities to increase business in patents, trademarks and design fields.

Most Patents or Trademarks are not exploited to their full potential because the owner of an IP asset does not fully understand or have access to the global market.

The best ideas are transformed into successful business ventures only if they reach the right man in the right market.

Our mission is accomplished when a potential business has become a reality because two companies have settled an IP agreement.

▶about us

We are a group of Italian Patent and Trademark Attorneys who want to help their clients to promote their IP assets all over the world.

For this purpose we offer our specialized experience in helping companies exploit their IP assets.

This web site is designed for offers and requests of licensing or assignment of IP rights, and is open to any contribution from any Patent and Trademark Attorney who wants to publish his clients' offers/requests.
